

SURVIVAIR®

Escape Breathing Apparatus (EBA)

- The **Survivair** EBA supplies five or ten minutes of emergency breathing air to ensure a safe escape from toxic or oxygen-deficient atmospheres.
- The **Survivair** EBA-5/10 is composed of a refillable cylinder, valve and pressure gauge assembly, breathing tube, protective air hood, and regulator, and is fully contained in a versatile carry pouch.
- The **Survivair** EBA fits easily over eyeglasses, beards, and hard hats with its large opening, flexible hood and elastic drawstring that provides a secure neck seal for minimum leakage and maximum protection.
- The hood is made of clear Tuftane film with permanent anti-fog film laminated inside the hood to ensure maximum visibility. Its operating temperatures are from 0°F to 160°F.
- The lightweight cylinders can be reused by simply refilling them with air.
- **Survivair** offers its EBA-HF5. It features a 5-minute, 15 cubic foot, lightweight aluminum cylinder and a regulator that delivers air to the hood at the higher flow rate of 72 liters per minute.

Survivair EBA Specifications

Description	EBA-5	EBA-10	EBA-HF5
Weight (Full Charge)	6.5 lbs.	8.5 lbs.	9.3 lbs.
Size (Package)	4.5 x 12.5 in.	4.5 x 16 in.	4.5 x 18.5 in.
Flow Rate	42 LPM	32 LPM	72 LPM
Cylinder Pressure	2216 psi	3000 psi	3000 psi
Hood Type	Drawstring	Drawstring	Drawstring
Hood Material	Polyurethane Film	Polyurethane Film	Polyurethane Film
Cylinder Type	3AL (8CF)	3AL (13CF)	3AL (15CF)
Operating Temperature, Degrees F	Zero to +160	Zero to +160	Zero to +16D
Carry Pouch Type	Fully Enclosed 3 Pos. Strap	Fully Enclosed 3 Pos. Strap	Fully Enclosed 3 Pos. Strap
Regulator	Adj. Flow Bal. Piston Type	Adj. Flow Balanced Piston Type	Adj. Flow Balanced Piston Type
Breathing Tube	Low Temp. Elastomer	Low Temp. Elastomer	Low Temp. Elastomer
Hood Connector	Molded Nylon	Molded Nylon	Molded Nylon
Carry Case	Blow Molded Polyethylene	Blow Molded Polyethylene	---
Unit Part Number	975080	975090	975190
Cylinder Part Number	975081	975091	975154
